

IBM OL23G - IBM I PERFORMANCE TUNING - I: PERFORMANCE TOOLS AND BASIC TUNING

Dauer: 2 Tage

Nr.: 37361

Durchführungsart: Präsenztraining

Preis: 1.590€ netto / 1.892,10 € inkl. 19 % MwSt.

Zielgruppe: This is an intermediate course is designed for data processing managers, programmers, and analysts.

Schulungsmethode: presentation, discussion, hands-on exercises, demonstrations on the system

Voraussetzungen: You should be able to:

Start and stop the operating system Start and stop subsystems

Manage job, message, and output queues Describe security concepts and create user profiles

This classroom course of two days explains how to balance the workload on the IBM i system to ensure optimum performance. Specifically, this course explains how to manage workloads, measure system performance, and tune the operating system to meet processing requirements. Hands-on exercises give you the opportunity to use the system functions that are available for controlling workload and tuning system performance. Evaluation criteria presented in this course are based on the latest information available from IBM development labs.

Training Paths that reference this course are:

System Administrator

Programm

Manage jobs by:

Setting the appropriate system values

Modifying subsystem descriptions to fit the workload

Controlling batch jobs

Tailoring job descriptions to fit processing needs

Create unique environments for running jobs by:

Creating subsystems for special applications

Directing jobs to run in these subsystems

Developing job descriptions for special jobs

Tune the performance of the system by:]

Setting up pools and activity levels to handle jobs

Tailoring execution parameters for job priorities

Evaluating current performance using information provided by the system
