

PMTalk

Project Management Collaboration

PMTalk the digital learning solution for project management (PMI® certified)

You are looking for a PMP®, CAPM® certification or still require PDUs (Credit Points) needed for your re-certification. However, you do not have the time to visit a face-to-face training. In addition, training budgets were reduced. Furthermore, your absence has to be planned and the project progress must be ensured in your ongoing projects. You are an autodidact, but still need the professional exchange and interaction with other project members.

PMTalk is a platform where digital learning paths are available, as well as an excellent learning environment, which is super-

vised by our certified learning coaches. 24hours / 7 days your coach is available, in less than 12 hours you get a response. That's your professional way of learning. Together with your coach you are always one step ahead.

A synchronous interaction between the learners (Chats, Forums, Skype, Webcasts, Virtual Classroom, ...) is integrated.

Meet requirements easily

Marc W. is aware of this dilemma. His project is international, he works in a global environment and has to interact virtually with many actors – facing him with new challenges!

In the future, these media will play a major part for Marc W. in the learning process ...

How?

Marc decides himself when and how he undergoes training. He can satisfy his learning needs at any time.

This innovative learning solution was developed by Threon, a long lasting partner of Integrata Cegos Group. For many years, we have been analysing how people learn. We know that learning is a complex process. Therefore, in this digital learning solution, we implemented a combination of professional expertise (project, program and portfolio management),

didactic knowledge and skills of the learning coaches as well as technical know-how.

A collaborative digital learning approach that enables a peer-to-peer-group competence development and learning on demand!

Your Benefit with Single sign on:

Single Sign on

PMTalk is immediately available
